10 Sec. 1 in the hearts and minds of men."
My answer follows:—
"Of every attempt at Association, and of every person it may be said, 'He that seeks to save his life shall lose it, and he that will lose it for Christ's sake (the Eernal Loves sake,) shall find it.' This pandering to the Bottomless Pit of impurity in Marriage in Religion, for the sake of money and a respectable seeming for Association, is—just what it is—the fact stands out and is its own exposition. But no revolting, no protestanism is needed, only a simple life lived. When men can stand firm and quietly live their life, they will do it without strife. Goethe's description of the perfect woman was,

'That she had her feet upon Earth and her head in the Heavens. Never can woman have her portion in Heaven till it is given her on Earth. Whilst she is pecuniarily dependent she will be a slave. She will sell hersell in so called marriage always whilst she must. My dear friendy ou do not know what I do. The deep depths of our social falseness have not been revealed to you. You have not been the good Samaritan to woman, by the ordination of Providence, as I have, when the respectable priest and Levite would have let her die, ere she should be allowed to tell of the thieves among whom she had fallen, thieves who had stolen her health, her purity, even her reason, under the pious pretexts of Religion and Law."

I was glad indeed that I wisted the Columbian Phalanx. Six or eight noble young men determined to leave off using tobacco. Since I left I have received a few lines from Mr. Campbell containing some information respecting their domain, and a few remarks besides, which I quote, to give you an idea of the man.

"Thank you for your kind promptings to a higher life. I want a higher lile—I want Association—I am happy and yet unhappy I am happy when I know there are great souis full of the beautiful and true, and unhappy, because I am here alone and none can understand me or sympathise with me. But I will wait my time. Nature errs not. Her laws are fixed, her course is onward. I have to day commenced work making cigar boxes. Can get nothing else to do. I am without the means to buy a meal of victuals. I know not what will be the result of all this. I hope for the better day.

There I have done my best to describe Mr. Campbell and the Columbian Phalanx. If you have got any right idea of either, I am glad of it. I think it I get good news from home that I shall go next to the Clarmount Phalanx on the Ohio between Columbia and Cincinnati. There seems to be no possibility of my seeing Leraysville, the distance into the interior of Pennsylvania is so great, and the road so dreadul as there is no snow, and the weather so

A Dix first began public life in the office of Adjutant General. The one is now Secretary of War, the other United States Senator. But every Adjutant General does not reach any future or greater eminence. What will be Mr. Farrington's fortune we cannot prophesy.

Since the appointment of Freeborn G. Jewett, of Onondaga, to a seat on the bench of the Supreme Court, people are asking for information, "who is hel?" What has he done?" So far as can be discovered, Mr. Jewett is regarded where he is best known, as a sound and capable lawyer, a man of integrity and judgmen, and perfectly correct in point of political standing. The applicants for this place were numerous. Judges Ruggles, Parker and Willard were spoken of. Some of the friends of Nicholas Hill, Jr., (and he has many) were anxious that he should be elevated to the bench, and it they could have been gratified, it is not saying more than the truth, the Supreme Court would have been improved. But the friends of Judge Ruggles are soured; they suffer themselves to speak intemperately and out of decorum. They abuse the Governor, and say that the rejection of Judge Ruggles for this place, "will result in making him Governor at the next election." It is a good idea; because a man cannot be Judge, he must needs be made Governor! To what particular stations prospective, the friends of the other non-preferred candidates propose to elevate them, is not as yet whispered aloud.

Senator Jones having done every thing in his power for the New York pitots, has departed the realm for Washington, to pay his devoits in the proper quarter. What kind of a Mayor would the Senator make? He is young, intelligent, active, and, as all agree, having made a very good Senator, perhaps he might, in the absence of a better, do up the Mayorabity in a passable manner. Will you take the matter into consideration, in committee of the whole party.

The collectorship of your city must be "a nice sort of place." Alderman Purdy was seen at the Goptiol to-day. But there are deeper schemes on foo

COTTON IN CALIFORNIA—THE OREGON SETTLERS.—We have been informed by a gentleman, who left the Pacific coast in December last, that two or three Americans are about to engage in the culture of cotton in the lower part of Upper California, and that they fell confident of raising a superior article and in great abundance. Their rancho or plantation is not far from San Diego, in lat. 33 N., the climate being warm and deligh fully fine—The same gentleman informs us that many of the Oregon settlers have arrived in the neighborhood of the Bay of San Francisco, in the Upper California, and taken up their abode there. They report Oregon as a poor country—nothing like the one it was represented to them to be—and appear thankful that the opportunity has been sforded them of leaving it and reaching a more fruitful and genial clime. So productive is the land in the neighborhood of San Francisco, that one bushel of wheat sown irrequently yields a crop of seventy five bushels, and this with very little trouble, while the climate is so dry and pure that sickness is almost unknown. To illustrate the remarkable dryness of the climate, it is but neccessry to state that wheel vehicles, furniture, &c., manufactured in New England of the best seasoned imber, shrink up shortly after reaching this section of California and fall to pieces unless every precaution is taken. American emigrants are constantly arriving and settling at the Baoramento and other streams emptying into the Bay of San Francisco. At the Yerbs Buen the English is the principal language spoken, the Alcalde being an American, and the time is not far distant when this part of California will teem with Anglo Sexon civilization and the thrifty products of Anglo Saxon hands.—New Orleans Picayune, Ftb. 28.

STEAMBOAT EXPLOSION—TEN LIVES LOST.—The Muscogee Democrat of the let inst, says:—The Muscogee Democrat of the let inst, says:—The mail Steamer Syren, Capt. Sharpless, plying between Chattahoochee and Apalachicole Bay, hurst one of her boilers on Wednesday night last, about midnight, as the boat was rounding out from Toney's landing, and killed at least ten persons, all belonging to the crew, with the exception of one negro boy, who was a passenger. Of the killed six were whites and four blacks, and among the former a son of Mrs. Tilley of this place—a lad who acted in the capacity of cabin boy. The captain was thrown aloft and fell into the water, from which he accaped unhurt. A lady passenger was rescued from the water by one of the engineers. One person was saved by the sinking of the boat, which floated off a bale of cotton which had been thrown on him by the explosion.

We have not heard whether any blame is attached to the Captain or not, but it is generally conceded that the boilers of the boat were of no account, and should not have been used so long.

New Brunswick.—The House of Assembly of New Brunswick, by a vote of 22 to 9, have passed a resolution which declares that the present Executive Council of the Province does not possess the confidence of the House or the country at large. This was followed by an Address to her Majesty, passed by a vote of 24 to 6, which sets forth the matiessance of the Lieutannt Governor, he having appointed for Provincial Secretary his son-in-law, who was also his private secretary, which caused the retirement of four members of her Majesty's Executive Council, the Governor concluding to keep him in office against their wish. This split between the Governor, the Executive Council, and the House of Assembly, has warmed up the blood of the New Brunswickers, and Frederickton has become for the moment the scene of fervent political excitement.

Missouri River.—The Jefferson City papers of the 22d inst, report a rise of several feet in the river opposite that place; they say it was then in good river opposite that place; they say it was then in good na vigable order and clear of ice and drift wood. Two or three boats have left here within the past two or three days for that river, and we notice one or two more making preparations at the landing to day to go up. Freights are said to be plenty, and all that is wanting to make produce come teeming out of the Missouri, is a good boating stage of water.

INFORMATION wanted of James Andreas, who left this city about 4 years ago for Mexico. It is now two years since his friends have received any word of him; any information respecting him would be thankfully received by his father, Robert Andreas, at Olnsyville, New 1 rovidence, R1.
